# TALK SENSE

Just say it and you're done!

Using **TALKSENSE** will keep your datastore updated, while freeing field forces' to make more of their time – more sales, more customer services tickets completed. Update data to any form within the CRM and any back-office system, just by talking to the app.

The kit includes a client based software component (on various edge platforms) and a core processing server, TALKSENSE's Contextual Processing Engine (CPE), optimized using Intel® Core™ i7 processor and Intel Toolkit OpenVINO technology.
